RFID-BLOCKING FRONT ZIPPER-POCKET FOR YOUR PASSPORT/WALLET

What is RFID?

Radio Frequency Identification uses electromagnetic fields to communicate with RFID readers. These radio waves allow the readers to automatically identify tags e.g. chips on your credit card and read the electronically stored information. In a modern age with 'Tap and Go' facilities, becoming a victim of RFID theft is a real possibility, as someone could scan your RFID card through your pocket or wallet without your knowledge. Fortunately, radio waves are relatively easy to interrupt – RFID blocking wallets and bags are similar to a Faraday cage - designed to block electromagnetic fields and subsequently prevent any communication between the tags and readers.

Don't worry about rain or water accidents, just one wipe with a cloth and your bag will look brand new.

4 KEY FEATURES

Anti-theft, cut-proof, weight balance & night safety.

Anti-theft
Its genius lies in the zipper that is fully hidden at the back of the bag. No thief will be able to find the opening of the bag and thus a way to your belongings.

Weight balance
The Bobby Anti-Theft Backpack is designed in such a way as to distribute weight down and back, relieving downward pressure on your shoulders by up to 25%.

Cut-proof
Designed with cut-proof PP protection board, the Bobby Anti-Theft Backpack ensures your belongings remain safe.

Night safety
The illuminant bars on the back and sides of the bag provide 360° reflector visibility up to 100m, ensuring your safety at night.
