THE FACTS

- We are always touching our phones, transferring bacteria to our devices.
- The average cell phone harbours more than 25,000 bacteria per square inch.
- A cell phone can be the most infected surface you come into contact with.
- People rarely clean or disinfect their phone, so germs and bacteria build up.
- What types of germs? E-coli, influenza and MRSA germs that can all cause infections.
- Safe-Guard Phone Sanitiser & Screen Cleaner has been developed to easily solve this growing problem.
